

POOL FENCE SAFETY CHECK TIME

- Never prop open a gate with objects or toys
- Fence panels should be secure and in good working order
- There should be no gaps or holes in the fence
- Check for missing, loose or rusted fence screws
- Gap under the fence should be less than 4 inches
- Objects that a child could use to climb on should be removed
- Remove all toys from the pool so they are not tempting
- Lock all pool chemicals in an area well away from children

TruClose Self-closing hinges. Hinges that will last a lifetime. See our [install](#) video.

IMPORTANT: Information above is supplied and expressed in the interests of consumer and public safety. For specific details relating to fence and gate safety, please be sure to follow local codes and rules. Remember that code-compliant, properly installed and maintained pool fences, self-closing and self-latching gates, pool covers and alarms are layers of protection, and are all useful in reducing the likelihood of unauthorized access to a pool, but are not full proof. There is absolutely no substitute for constant parental or lifeguard supervision.
